

Clarity Creative is one of the top search engine marketing agencies in Florida, USA. With over 16 years of experience in the IT business, our skill set continues to grow.

We chose the SpecialCase as an Upwork top-rated professional for some custom app development based on modern frameworks like Laravel and Vue.

The main objective of the project was to create a top-notch admin panel for generating Trivia with perfect UX design. Trivia is a specific set of questions and answers which help us to organize entertainment for corporate events and implement team building activity. One of the main requirements was the ability to generate Trivia in word/excel format.

The SpecialCase team demonstrated high responsiveness and speed of execution. They implemented modern admin panel based on Laravel Nova. Moreover, they helped us to install it on our server.

As a result of the project we received the high-quality and scalable web application which not only meets all our requirements but also exceeded expectations. We are satisfied with the collaboration and we definitely recommend SpecialCase as experts in web application development.

David Forman,

Founder of Clarity Creative Group
